SUBJECT: Staff Employee Associations

This is a reminder that a number of Staff employee associations have received official recognition at UCSD and we encourage their activities and programs. These groups hold regular monthly meetings and sponsor educational programs. Employees who wish to participate in these association meetings and programs must obtain supervisory approval in advance to do so.

The UCSD Staff Association and a variety of approved Staff Affirmative Action Associations foster communication between employees and University management, assist in the recruitment and retention of a diversified workforce and pursue other goals of mutual importance. For these reasons, I encourage all supervisors to permit employees to attend the meetings and programs of these associations as part of normal University business, when their job responsibilities do not conflict with their participation.

A list of all recognized staff employee affirmative action associations may be obtained from the Staff Affirmative Action Office. Please post this notice and bring it to the attention of supervisors, timekeepers and other appropriate department personnel.

Richard C. Atkinson
